

VARIO Carbon

PORTABLE ALLROUNDER

VERSATILE – LIGHT – POWERFUL

- High working pressure
- Enormous throw distance
- Stainless carbon vessel
- Extremely light
- Highly versatile with three modes of operation

HIGH WORKING PRESSURE

With a working pressure of 38 bar (constantly) the VARIO Carbon is the head of the class!

The high pressure allows the HiPRESS jet to push through every wall of flames!

ENORMOUS THROW DISTANCE

The high pressure enables a throwing distance of up to 21 m!

Thereby you can reach fires in a larger radius while staying out of danger yourself!

STAINLESS CARBON VESSEL

The carbon fiber reinforced polymer vessels offer high stability while staying free of corrosion!

EXTREMELY LIGHT

The carbon material also offers higher sturdiness and lower weight.

The VARIO 9 Carbon weighs no more than 20 kgs!

(VARIO 13 Carbon app. 25 kgs)

HIGHLY VERSATILE – 3 MODES OF OPERATION

One device – three modes! Switchable between HiPRESS, HiCAFS and Spray mode the VARIO Carbon series offers enormous flexibility.

Fluid foam, dry adhesive foam or efficient area spray – with the VARIO Carbon you get three devices packed into one!
